Contingency Courses EWG

- **Simultaneous look at existing courses**
  - **MGT 101 (Contingency Phase), Intro to BCE**
  - **MGT 484, Reserve Forces Airbase Combat Engineering**
  - **MGT 585, Contingency Engineer Command Course**
- **Aligned bodies of knowledge and topics**
  - **Most areas common to all three courses**
  - **Lesson focus, level of detail, and method of instruction may vary as appropriate for each course**
- **Adjusted areas of emphasis**
  - **More on Joint, C2, plans and logistics, C-CW, security**
  - **Less on Base Recovery After Attack**

AFIT Action Items from Prime BEEF/Contingency Training Panel

- **Set aside a small number of quotas for senior NCOs in each MGT585 Contingency Engineer Command Course**
  - **Primary Audience: CE officers with between 8 and 13 years commissioned service**

    Secondary Audience: CE senior non-commissioned officers (SNCOs). Between 10% and 15% of "primary audience" seats in each course offering may be reserved for master sergeants and above, to ensure a limited number of seats are available for SNCOs and to provide the overall student body with a broader mix of experience and perspectives on which to base in-class discussion
  - **Contingency-courses EWG supported proposal; AFIT to monitor demand and brief future ETRC**
